Junior Game Developer (Unity & Unreal)

Objective

Passionate and creative Junior Game Developer skilled in building interactive and visually engaging games using Unity and Unreal Engine. Strong understanding of C# and Python, eager to contribute to a dynamic game development team and grow as a professional developer. Open to working anywhere and continuously learning new technologies.

Education

- Bachelor of Commerce (B.Com), University of Calicut — Completed
- Game Development Course, Bigboy School of Game Development — Completed

Technical Skills

- Game Engines: Unity, Unreal Engine
- Programming Languages: C#, Python
- Game Design: Level design, lighting, environment setup, camera systems, mission logic • Tools: Visual Studio, Blender (basic), GitHub, Photoshop (basic)

Projects

1. Homeless (Unity)

Developed a mini open-world game featuring small missions and an interactive environment. Designed player movement, mission system, and world setup using Unity and C#.

2. Space Adventure (Unity)

Built a 3D space exploration game with spaceship controls, lighting, and a dynamic camera follow system.

3. Racing Challenge (Unity)

Created a car controller system with acceleration, braking, and camera switching mechanics.

4. Interactive Environment (Unreal Engine)

Designed a playable 3D world with basic object interaction and player movement using Blueprints.

Strengths

- Strong problem-solving and debugging skills
- Team-oriented and adaptable to new environments
- Eager to learn and apply new game development techniques
- Excellent attention to detail and creativity

Career Goal

To join a professional game development studio and contribute to creating immersive gaming experiences while improving my programming and design skills.
